# ink!

ink! is a domain-specific Rust language for smart contracts.

# ink!

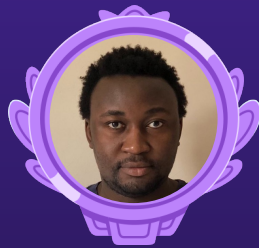

2019: ink! Is born under the Parity Technologies umbrella

2023: Exploration of various alternatives to WASM, resulting in a shift towards RISC-V

2024: Development and maintenance transitions from Parity into the ink! alliance

# ink!alliance

# ink!alliance

**5.x**

**6.0**

 **NEW FEATURE**

# Solidity Cross-Contract Calls + MetaMask Support

ink! can speak with Solidity contracts and MetaMask out of the box. You can even use it to write parts of your dApp in Solidity and other parts in Rust with ink!

[See ink! examples](#)

# ink!ubator

A funding program for advancing the ink!  
ecosystem.

# ink!ubator

Focused on impulsing the usage of ink! v6.X

- Up to \$50,000 in funding per application
- Feedback during application and evaluation
- Introductions to relevant teams/projects
- Code reviews or audits (depending on scope)
- Co-promotion opportunities

# ink!ubator

You are a perfect fit if:

- Your project clearly shows the advantage of ink!
- Your idea is innovative and contributes to the growth of Web3, Polkadot, and the ink! ecosystem
- Your team has proven experience with relevant technologies

# ink!ubator

Check out the growing collection of  
RFPs!

Currently looking for CTF-like challenges for  
ink!
